EQUINE JOINT SUPPLEMENTS

ANIMAL HEALTH DIVISION

Hyalogic is the leader in all hyaluronic acid products. All of the products below are made with premium grade, high-molecular weight hyaluronic acid. Whether you're a horse trainer or a dog lover, our HA products are sure to give your animals the joint and muscle support they deserve.

Hyalun® is a liquid solution of pure hyaluronic acid for oral administration to horses. Hyaluronic Acid (HA) is a mucopolysaccharide that occurs naturally throughout the horses body. HA has been shown to support healthy joint and cartilage function by lubricating the joint as an integral component of synovial fluid. HA aids in maintaining strong and healthy tendons and ligaments by providing nourishment, waste removal and hydration. HA also supports the bones, eyes, gums, skin, and hair coat.

- Benefits of HA**
- \*Supports joint and cartilage function
  - \*Reduces joint friction
  - \*Maintains joint mobility
  - \*Lubricates the joint

Keep your horse's joints in top condition with Hyalun®, the easy to use high molecular weight hyaluronic acid formula that works to provide superior equine joint maintenance and support.

Hyalun® helps to support and maintain

- joint mobility and flexibility
- joint and cartilage function

Your horse is a well-oiled machine.  
Keep it lubricated with Hyalun®

*Experience the Hyalun® difference and keep your horse's joints in peak condition.*

Hyalun® acts to maintain proper joint movement, lubrication and cushioning. If we were to compare the joint of the horse to the automobile engine; the synovial fluid in the joint mimics the oil in a car engine. At regular intervals we replace the oil in our car engines because the heat and friction from normal operations causes breakdown of the oil viscosity. The oil becomes thinner and less able to protect the metal surfaces from excess wear. HYALUN acts the same way in the joints. In the beginning horses were grazers. They were not used for recreational activities, low impact labor, competition or strenuous work and because of the anatomical construction of the horses limbs, all horses are susceptible to joint issues. Simply, as the horse ages or when the joints are stressed or injured it is difficult to replace hyaluronic acid. Therefore all horses today can benefit by supplementing Hyaluronic acid, HYALUN will pick up when the horses body fails.

As you evaluate your horse's daily schedule, you can determine which Hyalun® best suited for your horse's joint health maintenance.

Hyalun	HYALUN 30	HYALUN 90	HYALUN PRO 30	HYALUN PRO 90	HYALUN PRO GEL
Item #	SUP1021	SUP1090	SUPHP30	SUPHP90	SUP1031G
price	\$33.99	\$84.99	\$59.99	\$152.99	\$29.99
product size	30 ml (1 oz)	180 ml (1 oz)	90 ml (3 oz)	270 ml (9 oz)	30 cc (1 oz)
serving size	1 ml per 1,100 lbs	1 ml per 1,100 lbs	3 ml per 1,100 lbs	3 ml per 1,100 lbs	10 cc per 1,100 lbs

use of horse	Recommended dosage for the horse used for recreational riding, low impact labor, and aging.		<b>Concentrated formula</b> for the horse used in a strenuous work environment or competition horses for barrel racers, reiners, cutting horses, hunter/jumpers, and racing thoroughbreds who exhibit enormous amounts of stress to their joints		
concentration	0.5% high molecular hyaluronic acid		1 % high molecular hyaluronic acid		
inactive ingredients	normal saline		normal saline, 1,2-propanediol, methylparaben and propylparaben		

**HyaFlex™**  
ORAL HYALURONIC ACID (HA)

30 Day supply  
hyaluronic acid  
joint supplement  
for dogs and cats.  
SUP1011 30 ML  
\$25.99

**EquiDurance™**

MUSCLE ENDURANCE TECHNOLOGY  
WITH BETA-ALANINE, L-CARNOSINE AND HYALURONIC ACID

Supplies the horses's muscle with l-carnosine storage. Then when the horse is exercised the muscle secretes stored l-carnosine to prevent accumulation of lactic acid, which makes the horse's muscle stiff and sore. 90 day supply equine muscle supplement with hyaluronic acid.  
SUPEQD 270 ML \$118.99
